

## Vircom's resident gurus launch a new Email Security blog

*Security experts in Email Security, Vircom's employees launch a new blog named "Email Security Matters" to discuss Email security, best practices, spam and industry news.*

Montreal, Canada, October 21, 2009 – Vircom, Inc., a thought leader in the corporate email messaging security, announced today the launch of its employees and resident gurus' technical blog, "Email Security Matters". Focused on modern technologies and events - and written directly by Vircom's security experts and technical analysts - articles will offer a wide variety of topics among four main categories: Email Security, Best Practices, Spam of the Week and Industry News. EmailSecurityMatters.com invites IT Managers, SysAdmins, NetAdmins and Security Gurus around the world to share their thoughts, express their opinions, share their knowledge and suggest content.

"Vircom has always been renowned for its customer-centric approach, expertise and highly techno-savvy support and services employees," said Mike Petsalis, COO of Vircom. "With the EmailSecurityMatters.com blog, we are delighted to go one step further and offer a platform where our security specialists will be able to share their knowledge and expertise with IT Managers, discuss new trends, technologies and solutions."

In this week's featured articles, EmailSecurityMatters.com brings several new topics to the table. A first write-up explains why you shouldn't declare your primary mail server (MTA) as a secondary MX in "Email Security Gateway Deployment". Another article discusses why some Spam trends seem to disappear and come back months later in "Image Spam is Back!" The third feature post analyses the good and bad of Cloud Computing for Email Security in "Three reasons why Cloud Computing may not be for you".

### About EmailSecurityMatters.com

EmailSecurityMatters.com is a community portal where users and experts exchange security news and tips, best practices, discuss and analyze new Email Security technologies. For additional information, please visit <http://www.emailsecuritymatters.com>.
