

modusGate™ Email Security wins Silver award from MExchange.org

Vircom modusGate™, an antispam gateway software for Microsoft® Exchange, is reviewed and awarded by independent Exchange specialist J. Peter Bruzzese.

Montreal, Canada, April 22, 2010 – Vircom’s modusGate™, an Email Security gateway software for Exchange mail servers, receives the Silver award from MExchange.org’s independent reviewer J. Peter Bruzzese.

Triple MCSE, ActiveDirectory and Exchange specialist, J. Peter Bruzzese, reviewed modusGate™ in a virtualized environment connected to a Microsoft® Exchange 2010 Server. He was immediately impressed by how easy it was to be up and running with Vircom’s email security: “What I found to be so compelling about modusGate™ is that the installation, once complete, provides the organization with a fully functional solution [...] It worked without any frustration and I was up and running with a fully functional, advanced security and email filtering solution that included reports and monitoring and a cornucopia of additional features.” Being a critical component of many organisations, IT Security products need to be tied in to expert service and support from vendors. Peter was overwhelmed by Vircom’s support quality and gave it as a 5-star Gold Award.

Vircom COO Mike Petsalis comments, “We are delighted with J. Peter Bruzzese’s review and opinions on the industry. Whether it is intended to be used in dedicated appliances or virtual servers, software-based email security with spam protection has the flexibility that today’s businesses require. Add ease of use, performance, reliability and technical expertise to our offering and you get a solution that IT administrators will adopt and actually enjoy working with.”

Optimized for small and medium-sized corporate and service provider environments, modusGate™ is an email security gateway that runs on Windows 2003, 2008 and Virtual Machines. It performs spam filtering for virtual and physical email servers, including Exchange 2003, 2007 and 2010 as well as Lotus® Domino and standard SMTP servers.

The modusGate™ 4.7 review can be read at MS Exchange: Vircom modusGate Review.

About Vircom

Vircom Inc. is a software development and professional services company focused exclusively on email messaging security. Founded in 1994, Vircom is the only email security vendor to offer a wide range of deployment options, proprietary anti-spam technology, complete Windows™ infrastructure integration and premium
