

directQuarantine for Outlook

Because an IT Admin has better things to do

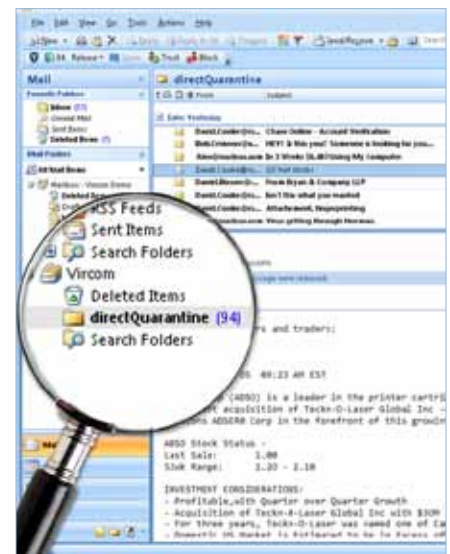

What is directQuarantine?

directQuarantine is a Microsoft Outlook add-on module for modusGate and modusMail designed to give end-users total visibility and control over their quarantined messages and relieve IT administrators from day-to-day quarantine management. With directQuarantine users can:

- **View** quarantined messages live, including sender, full subject, date, content type (spam, phishing, virus, etc.), attachment names, as well as the entire message body in HTML or text format.
- **Sort** and filter messages by clicking on a column name, e.g., From, Subject, Received and message Type.
- **Search** for messages by the sender's name, email address, or the subject, or search the full message body.
- **Release** a single message or multi-select several messages as false positives and manage whitelists and blacklists.
- **Delete** a single message or multiple messages from the quarantine, or empty it completely.
- **Report** a single message or multi-select several messages that should have been filtered as spam to automatically

administrators are inevitably involved. More often than not, this results in time-consuming searches for the admin and a tedious wait for the end-user.

directQuarantine aims to end unproductive solutions by providing the end-user with the tools needed to easily manage quarantined messages themselves. End-users will have access to their email quarantine in real-time directly from Outlook, providing a seamless user experience while relieving IT administrators from tedious day-to-day quarantine management.

How does it work?

directQuarantine allows users to apply familiar Outlook functions to their quarantined messages. There is no need to sift through hundreds of spam messages to find that all-important sales email. Outlook's built-in search tool makes quick work of locating false-positives. Select a single, or multi-select several messages, and right-click for several instant release options, for example the email is released and the sender is added to the trusted list (which allows future messages from the same address to bypass the spam filters and always be delivered). The same right-click on the message(s) can also block the sender, effectively updating the blacklist live.

With a dedicated directQuarantine folder and a simple toolbar integrated into Outlook, users can view or delete their quarantined messages at any time without having to logon to any web applications. What's more, any attachments (only attachment names can be viewed), viruses, phishing links and all other electronic threats remain safely on the modusGate server and are not downloaded to Outlook, ensuring the highest level of security.

The real advantage however, is the time IT administrators will save by putting the task of email quarantine management into the hands of end-users.

Deployment and Architecture

directQuarantine integrates naturally within your infrastructure and provides a service layer between email clients and the modusGate or modusMail server – the add-on service controls are installed on the same server or VM as modusGate or modusMail. directQuarantine also supports various environments for service providers.

For directQuarantine clients, the Outlook add-on is deployed easily using an Active Directory Group Policy Object (GPO).

directQuarantine integration with modusGate

directQuarantine Requirements

directQuarantine Server

Platform	Requirements
modusGate or modusMail	Version 5.1 or higher
OS	Windows 2003/2003R2 (x86/x64), 2008 (x86/x64)/2008R2 (x64), and Small Business Server 2003 (x86), 2008 (x64), 2011 (x64)
Components	.NET Framework 4.0
Database	Microsoft SQL Server 2000 (x86), 2005 (x86/x64), 2008/2008R2 (x86/x64) or SQL Server 2005 Express Edition (x86)

directQuarantine Client

Platform	Requirements
OS	Windows XP SP2, Vista, 7 (32-bit/64-bit)
Components	.NET Framework 4.0 Extended
Email Client	Microsoft Outlook 2003, 2007 (SP2), and 2010 (32-bit/64-bit)

Pricing

Users	Cost/user/year	Renewal & updates
10-99	\$5.00	\$1.00
100-249	\$4.75	\$0.95
250-499	\$4.50	\$0.90
500-749	\$4.25	\$0.85
750-999	\$4.00	\$0.80
1,000-1,499	\$3.50	\$0.70
1,500-2,499	\$3.25	\$0.65
2,500-4,999	\$3.00	\$0.60
5,000+	\$2.50	\$0.50
